WORK EXPERIENCE

Fullstack Web Developer
Pars Design, Istanbul

2019 - Present

In this sector, which I started to take part in 2019, I have been working full-time at Pars Design since the beginning of 2020. I am a part of this beautiful team. I am a software developer who loves to learn and use new technologies. In my spare time, I do freelance work and produce various software in the web and mobile fields.

Junior Developer
STR Agency, Istanbul

2018 - 2019

I can say that the unbearable lightness of learning software is this period. matter ample wrong writing here to some times for you. My aim was just to make my political and philosophical state capable of talking to the processor.

Technology Editor
DNC Media, Istanbul

2017 - 2018

You have not been so exposed to adobe and its many text, photo and video editors and tools. I was also struggling with saying goodbye to things and some complicated things.

EDUCATION

Master's degree education
The Istanbul University, Istanbul

2016 - 2019

It is true that I had a period in which I made important gains in politics, philosophy and democracy.

Bachelor of Social Science
Unversity of Kocaeli, Kocaeli

2010 - 2012

Although I would like to think about the best software tools rather than the best management approach for humanity, the reality is sometimes different.

Highschool Education
Ordu Anatolian High School, Ordu

2006 - 2010

This place is worth talking about separately.
